OSV-101 214' DIVE-SALVAGE VESSEL

\$795,000 USD

This supply vessel was converted to a dive-salvage boat but it can easily be converted into a fish packer or a cargo boat. The galley was remodeled in 2009 and the boat is in great condition. One auxiliary engine would need to be replaced or rebuilt.

The vessel has long range and multi-purpose capability. It has been laid up for a few years and needs some re-commissioning work but there is favorable pricing for a quick sale.

Price: \$795,000.00 USD
(For sale where is - as is)
